Subject: HLC: Request for inclusion of letter to Mayor in Commission's June 6th briefing packet
Date: Thu, May 30, 2019 5:38 pm
To: Kesley.lindquist@slcgov.com

Please include the attached letter to the Mayor in the briefing packages with respect to the Landmark Commission's June 6th hearing. I realize the packets may have already gone out, and if so, please send it to the Commission members individually.

The letter to the Mayor requests that she invoke Utah Code Annotated Sec. 79-3-202(f) to request siting technical assistance from the Utah Geological Survey with respect to the Department of Public Utilities ("DPU") proposed 4th Avenue Chemical Treatment Plant (the "Well") at approximately 4th Avenue and 200 North Canyon Road, Salt Lake City, Utah. U.C.A. Sec. 79-3-202(f) provides, in part, that conditioned on a request from a local government, that the Utah Geological Survey may "assist local and state agencies . . . at the request of state agencies or other governmental agencies, [to] review the siting of critical facilities . . ."

The HLC may also constitute "local government" within the meaning of U.C.A. Sec. 79-3-202(f), and the Commission would qualify to make a similar request to the Utah Geological Survey to assist the HLC in its deliberations concerning the Well.

Alternatively, the HLC might also condition or reject with DPU application for an exception permit on the condition that the DPU request and present to the Commission a special opinion letter from the Utah Geological Survey on the geotechnical risks of and siting decision for the proposed site at 4th Avenue and North Canyon Road.

Please feel free to contact me with any questions.
Sincerely,
Kurt A. Fisher
